

TeamSegway

Over 3000 events

Having hosted more than 3000 team events with TeamSegway over the last ten years – we think we have found the perfect setup. It's so popular because the event is designed for maximum engagement.

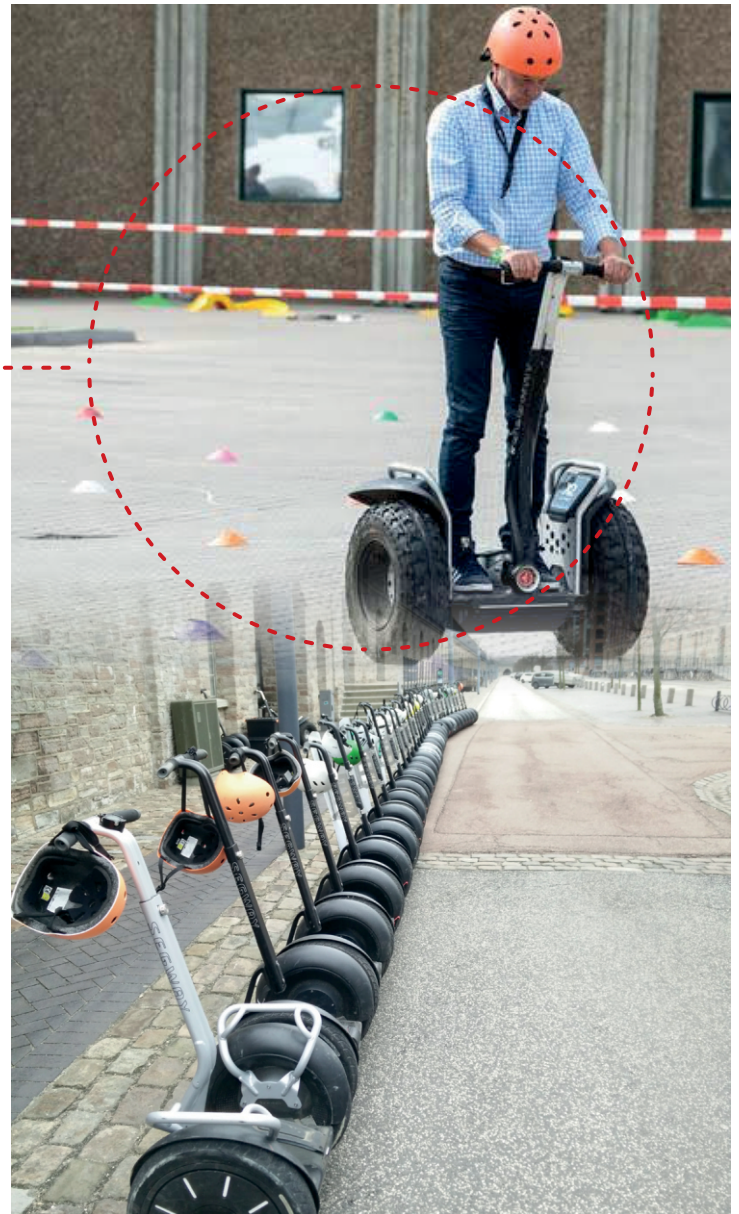

Segway is unique because it balances all the physical differences on the team, so everyone is equal.

Up to 5 teams on each course compete on a tactical and complex challenging course adapted to the surroundings so that safety assured.

We put tactical skills, communication, and a little luck into play here, as a series of tasks must be completed correctly against time and up to the four other teams.

We designed the activity to optimize collaboration with an ongoing change of roles.

The event consists of a training session, track testing, a qualifying heat and a grand finale, which challenges both body and brain.
