

Team Construct

Get the ball rolling

"The Pipe" is a fun and educational team exercise that calls for analysis, ingenuity and collaboration.

Everyone contributes - in the simplest form - to constructing a tower that will support a pipe with built in challenges.

The task is for each team to build a COMPLETELY CLOSED PIPE SYSTEM that meets a few simple requirements. Yet it is remarkably challenging and fun.

A golf ball has to be able to roll all the way to the bottom of the finished structure.

The instructor and your colleagues will test the construction who see if it meets all criteria. At the same time, the creative design and the collaboration along the way are a part of the final score

TeamConstruct works well as a formative experience focused on collaboration. The teams constantly have to adjust, invent, construct, evaluate, reinvent, adapt and qualify.

And everyone can contribute with their skills.
